

1. In your group, take the time to introduce yourselves to each other. Names of those in group:
2. When I returned to my townhouse after Yule with my family, I discovered that I had not left on the heat and it was 5° . I turned on the heaters, heading for a temperature of 20° . I observed that after 12 hours, it had finally reached 18° . What is the effective conductivity of my home?
3. What are the units of effective conductivity?
4. Can you change to more “human” units?
